CONTENTS OF VOLUME 250

No. 1. *August* 1975

PAGE

The effects of extracellular pH and buffer concentration on the efflux of lactate from frog sartorius muscle. By G. W. MAINWOOD and PAULINE WORSLEY-BROWN 1

The mechanism of acute renal ischaemia caused by adrenalectomy in the rat. By W. S. PEART and A. C. PESSINA 23

Chloride transport in human red cells. By MADS DALMARK . 39

Chloride and water distribution in human red cells. By MADS DALMARK 65

Actions of γ-aminobutyric acid on sympathetic ganglion cells. By P. R. ADAMS and D. A. BROWN. With an Appendix by D. A. BROWN and L. SAUNDERS 85

Binomial analysis of quantal transmitter release at glycerol treated frog neuromuscular junctions. By M. D. MIYAMOTO . . 121

The effects of cyclic adenosine-3′,5′-monophosphate and other adenine nucleotides on body temperature. By M. J. DASCOMBE and A. S. MILTON 143

Effects of chronic treatment with various neuromuscular blocking agents on the number and distribution of acetylcholine receptors in the rat diaphragm. By C. C. CHANG, SING-TAI CHUANG and M. C. HUANG 161

Effects of stimulating the acetycholine receptor on the current–voltage relationships of the smooth muscle membrane studied by voltage-clamp of potential recorded by micro-electrode. By T. B. BOLTON 175

No. 2. *August* 1975

Aerobic and anaerobic metabolism in smooth muscle cells of taenia coli in relation to active ion transport. By R. CASTEELS and F. WUYTACK 203

Uptake of 5-methyltetrahydrofolic acid by the rat jejunum. By J. A. BLAIR, A. J. MATTY and A. RAZZAQUE 221

PAGE

Effect of intracellular injection of calcium and strontium on cell communication in heart. By WALMOR C. DE MELLO 231

Drinking by dogs during and after running. By W. J. O'CONNOR 247

Effect of adrenal hormones on thyroid secretion and thyroid hormones on adrenal secretion in the sheep. By IAN R. FALCONER and F. JACKS 261

Tonic release of transmitter at the neuromuscular junction of the crab. By I. PARNAS, R. RAHAMIMOFF and Y. SARNE 275

The effectiveness of bicuculline as an antagonist of GABA and visually evoked inhibition in the cat's striate cortex. By A. M. SILLITO 287

The contribution of inhibitory mechanisms to the receptive field properties of neurones in the striate cortex of the cat. By A. M. SILLITO 305

Stimulation by aldosterone of the sodium efflux in barnacle muscle fibres: effects of RNA inhibitors and spironolactone. By E. EDWARD BITTAR and ROBERT B. TALLITSCH 331

The independence of channels in human vision selective for direction of movement. By EUGENE LEVINSON and ROBERT SEKULER 347

Adrenergic influences on the electrical potential across the colonic mucosa of the rabbit. By R. J. LENNANE, W. S. PEART and J. SHAW 367

Regional differences in the effect of bile salts and absorption by rat small intestine *in vivo*. By D. R. SAUNDERS 373

Response of ventrobasal thalamic cells to hair displacement on the face of the waking monkey. By JAMES N. HAYWARD 385

Amino acid movements across the wall of anuran small intestine perfused through the vascular bed. By C. A. R. BOYD, C. I. CHEESEMAN and D. S. PARSONS. 409

Muscular reflex stimuli to the cardiovascular system during isometric contractions of muscle groups of different mass. By D. I. MCCLOSKEY and K. A. STREATFEILD 431

Factors governing the periodic activation of supraoptic and paraventricular neurosecretory cells during suckling in the rat. By D. W. LINCOLN and J. B. WAKERLEY 443

No. 3. *August* 1975 PAGE

Pulmonary vasomotor nerve responses in isolated perfused lungs of *Macaca mulatta* and *Papio* species. By the Late I. De Burgh Daly, D. J. Ramsay and B. A. Waaler 463

Comparison of thermal exchanges in men and women under neutral and hot conditions. By J. Bittel and R. Henane . . 475

The tendon organs of cat medial gastrocnemius: significance of motor unit type and size for the activation of Ib afferents. By R. M. Reinking, J. A. Stephens and D. G. Stuart . . . 491

The relative contributions of the folds and caveolae to the surface membrane of frog skeletal muscle fibres of different sarcomere lengths. By Angela F. Dulhunty and Clara Franzini-Armstrong 513

Effects of changes in the composition of the serosal solution on the electrical properties of the toad urinary bladder epithelium. By Arthur L. Finn and Luis Reuss 541

Cell electrical potentials during enhanced sodium extrusion in guinea-pig kidney cortex slices. By F. Proverbio and G. Whittembury 559

Discharges of relay cells in lateral geniculate nucleus of the cat during spontaneous eye movements in light and darkness. By Hiroharu Noda 579

The effect of aldosterone and the renin-angiotensin system on sodium, potassium and chloride transport by proximal and distal rat colon *in vivo* By Diana Dolman and C. J. Edmonds . . 597

The relative importance of central nervous catecholaminergic and cholinergic mechanisms in drinking in response to angiotensin and other thirst stimuli. By J. T. Fitzsimons and Paulette E. Setler 613

Sweat gland function in isolated perfused skin. By K. G. Johnson 633

Reinnervation of rat skeletal muscle in the presence of α-bungarotoxin. By J. K. S. Jansen and D. C. Van Essen 651

Ionic dependence of luteinizing-hormone-induced steroidogenesis in the rabbit ovary. By J. R. Bedwani and P. Y. D. Wong . . 669

Ion influxes during the inhibitory junction potential in the guinea-pig taenia coli. By A. Den Hertog and L. P. Jager . 681

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

25–26 *April* 1975

SUBJECT INDEX

ACTH, effect of adrenal hormones on thyroid secretion and thyroid hormones on adrenal secretion in the sheep, **250**, 261

Acetylcholine receptors, effects of chronic treatment with various neuromuscular blocking agents on the number and distribution of – in the rat diaphragm, **250**, 161

effects of stimulating the – on the current–voltage relationships of the smooth muscle membrane studied by voltage-clamp of potential recorded by microelectrode (guinea-pig), **250**, 175

Adenosine triphosphate, effects of intracarotid-infusions on cerebral blood flow and metabolism in the anaesthetized baboon, **250**, 38*P*

the effects of noradrenaline, 5-hydroxytryptamine and dopamine on synaptic membrane ATPases (rabbit), **250**, 47*P*

Adrenalectomy, the mechanism of acute renal ischaemia caused by – in the rat, **250**, 23

Aldosterone, stimulation by – of the sodium efflux in barnacle muscle fibres: effects of RNA inhibitors and spironolactone, **250**, 331

the effect of – and the renin-angiotensin system on sodium, potassium and chloride transport by proximal and distal rat colon *in vivo*, **250**, 597

Amino acid transport, amino acid movements across the wall of anuran small intestine perfused through the vascular bed, **250**, 409

γ-aminobutyric acid, actions of – on sympathetic ganglion cells (rat), **250**, 85

Amylase secretion, control of – in the parotid gland (mouse), 1*P*

Angiotensin, the relative importance of central nervous catecholaminergic and cholinergic mechanisms in drinking in response to – and other thirst stimuli (rat), **250**, 613

Bicuculline, the effectiveness of – as an antagonist of GABA and visually evoked inhibition in the cat's striate cortex, **250**, 287

Bile, comparison of micelle-forming and non-micelle-forming – salt excretion by the liver of the dog, **250**, 41*P*

Bile salts, regional differences in the effect of – on absorption by rat small intestine *in vivo*, **250**, 373

Blood-brain barrier, penetration of labelled protein from blood into foetal brain and c.s.f. (sheep), **250**, 25*P*

Blood-brain transport, the specificity of glucose and amino acid carriers in the capillaries of the dog brain, **250**, 21*P*

Brain temperature, an indirect estimate of total brain energy metabolism in the new-born infant, **250**, 15*P*

Breathing pattern, effects of a rise in body temperature on the pattern of breathing in man, **250**, 40*P*

Bungarotoxin, effects of chronic treatment with various neuromuscular blocking agents on the number and distribution of acetylcholine receptors in the rat diaphragm, **250**, 161

α-bungarotoxin, reinnervation of rat skeletal muscle in the presence of –, **250**, 651

Calcium, effect of intracellular injection of – and strontium on cell communication in heart (dog), **250**, 231

Carbachol, the relative importance of central nervous catecholaminergic and cholinergic mechanisms in drinking in response to angiotensin and other thirst stimuli (rat), **250**, 613

Cardiovascular response, muscular reflex stimuli to the cardiovascular system during isometric contractions of muscle groups of different mass (human), **250**, 431

Catecholamines, the relative importance of central nervous catecholaminergic and cholinergic mechanisms in drinking in response to angiotensin and other thirst stimuli (rat), **250**, 613

Caveolae, the relative contributions of the folds and – to the surface membrane of frog skeletal muscle fibres at different sarcomere lengths, **250**, 513

Cerebral blood flow, cerebral autoregulation in chronically hypertensive baboons, **250**, 16*P*

effects of intracarotid adenosine triphosphate infusions on – and metabolism in the anaesthetized baboon, **250**, 38*P*

Chloride flux, choride transport in human red cells, **250,** 39
Colon, the effect of aldosterone and the renin-angiotensin system on sodium, potassium and chloride transport by proximal and distal rat – *in vivo*, **250,** 597
Cortical inhibition, the contribution of inhibitory mechanisms to the receptive, field properties of neurones in the striate cortex of the cat, **250,** 305
Cortisol, effect of adrenal hormones on thyroid secretion and thyroid hormones on adrenal secretion in the sheep, **250,** 261
Cyclic AMP, the effect of – and other adenine nucleotides on-body temperature (cat), **250,** 143

Drinking, – by dogs during and after running, **240,** 247
the relative importance of central nervous catecholaminergic and cholinergic mechanisms in – in response to angiotensin and other thirst stimuli (rat), **250,** 613

Electrogenic pump, strophanthidin effects on extracellular K^+ and electrogenic pumping in the cuneate nucleus (cat), **250,** 36*P*
cell electrical potentials during enhanced sodium extrusion in guinea-pig kidney cortex slices, **250,** 559
Exercise, drinking by dog, during and after running, **250,** 247
Eye movements, discharges of relay cell in lateral geniculate nucleus of the cat during spontaneous – in light and darkness, **250,** 579

Fatigue, the fatigability of human motor units, **250,** 37*P*
the site of – in sustained maximal contractions of the quadriceps muscle (man), **250,** 45*P*
Fever, endogenous pyrogen – prostaglandins release and prostaglandin synthetase inhibitors (cat), **250,** 18*P*
Foetus, penetration of labelled protein from blood into foetal brain and c.s.f. (sheep), **250,** 25*P*
Folic acid, uptake of 5-methyltetrahydrofolic acid by the rat jejunum, **250,** 221

GABA, the effectiveness of bicuculline as an antagonist of – and visually evoked inhibition in the cat's striate cortex, **250,** 287
Gastric acid, – and motor responses to electrical stimulation of afferent and efferent fibres in the cat's vagus, **250** 17*P*
Glycerol, binomial analysis of quantal transmitter release at – treated frog neuromuscular junction, **250,** 121

Hair, response of ventrobasal thalamic cells to – displacement on the face of the waking monkey, **250,** 385
Hemicholinium, effects of chronic treatment with various neuromuscular blocking agents on the number and distribution of acetylcholine receptors in the rat diaphragm, **250,** 161
Hypertension, cerebral autoregulation in chronically hypertensive baboons, **250,** 16*P*

Inhibitory potential, ion fluxes during the inhibitory junction potential in the guinea-pig taenia coli, **250,** 681
Intestinal mucosa, adrenergic influences on the electrical potential across the colonic mucosa of the rabbit, **250,** 367
amino acid movements across the wall of anuran small intestine perfused through the vascular bed, **250,** 409
Ion transport, aerobic and anaerobic metabolism in smooth muscle cells of taenia coli in relation to active –, **250,** 203
Ionic concentration, chloride and water distribution in human red cells, **250,** 65
Isometric contractions, muscular reflex stimuli to the cardiovascular system during – of muscle groups of different mass (human), **250,** 431

Jejunum, uptake of 5-methyltetrahydrofolic acid by the rat –, **250,** 221

Lactate, the effects of extracellular pH and buffer concentration on the efflux of – from frog sartorius muscle, **250,** 1
Lateral geniculate nucleus, discharges of relay cells in – of the cat during spontaneous eye movements in light and darkness, **250,** 579
Luteinizing hormones, ionic dependence of luteinizing hormone-induced steroidogenesis in the rabbit ovary, **250,** 669

Mechanoreceptors, response of ventrobasal thalamic cells to hair displacement on the face of the waking monkey, **250,** 385

Membrane resistance, the effect of divalent cations on pancreatic acinar cell membrane potential and resistance, **250,** 31*P*

Mesenteric ganglion, functional organization of the guinea-pig inferior –, **250,** 27*P*

Metabolism, aerobic and anaerobic – in smooth muscle cells of taenia coli in relation to active ion transport, **250,** 203

Metamorphosis, development of the ipsilateral visual projection in axolotls treated with thyroxine, **250,** 28*P*

Molluscan neurone, mechanism of a long lasting hyperpolarization in an identified neurone of *Helix aspersa*, **250,** 43*P*

Motor control, the tendon organs of cat medial gastrocnemius: significance of motor unit type and size for the activation of Ib afferents, **250,** 491

Motor units, the fatigability of human –, **250,** 37*P*

Muscle fibres, stimulation by aldosterone of the sodium efflux in barnacle muscle fibres: effects of RNA inhibitors and spironolactone, **250,** 331

the relative contributions of the folds and caveolae to the surface membrane of frog skeletal muscle fibres at different sarcomere lengths, **250,** 513

Muscle metabolism, 'economy' of force maintenance during electrically stimulated, isometric contractions of human muscles, **250,** 13*P*

Muscle spindles, 'static' and 'dynamic' nuclear bag fibres in isolated cat –, **250,** 11*P*

Nerve, compartments and barriers in mammalian peripheral – (rabbit), **250,** 12*P*

Nerve membrane, the effect of surface charge on the – on the action of tetrodotoxin and saxitoxin in frog myelinated nerve, **250,** 34*P*

Neuromuscular junction, binomial analysis of quantal transmitter release at glycerol treated frog –, **250,** 121

effects of chronic treatment with various neuromuscular blocking agents on the number and distribution of acetylcholine receptors in the rat diaphragm, **250,** 161

tonic release of transmitter at the – of the crab, **250,** 275

Neuromuscular transmission, functional denervation of skeletal muscle in the mouse after the local injection of a postsynaptic blocking fraction of *Naja siamensis* venom, **250,** 26*P*

Neurosecretory cells, factors governing the periodic activation of supraoptic and paraventricular – during suckling in the rat, **250,** 443

New-born, an indirect estimate of total brain energy metabolism in the – infant, **250,** 15*P*

Ouabain, medullary cell Na and K concentration and water content, during K depletion at 0° C and re-warming; effects of – and ethacrynic acid (rat), **250,** 23*P*

Ovary, ionic dependence of luteinizing-hormone-induced steroidogenesis in the rabbit –, **250,** 669

Oxygen consumption, – of liver and kidney of *Rana cancrivora* in relation to environmental osmolality, **250,** 46*P*

Pancreas, an improved method for perfusion of the isolated rat –, **250,** 4*P*

Pancreatic acinar cells, electrical coupling between – (mouse, rat), **250,** 2*P*

the effect of divalent cations on – membrane potential and resistance, **250,** 31*P*

Parotid gland, control of amylase secretion in the – (mouse), **250,** 1*P*

effects of post-ganglionic sympathectomy relating to parotid 'degeneration secretion' in rats, **250,** 7*P*

pH, the effects of extracellular – and buffer concentration on the efflux of lactate from frog sartorius muscle, **250,** 1

Potassium fluxes, inhibition of the calcium induced increase in the potassium permeability of human red blood cells by quinine, **250,** 32*P*

Potential difference, adrenergic influences on the electrical potential across the colonic mucosa of the rabbit, **250,** 367

Prostaglandins, endogenous pyrogen fever, prostaglandin release and prostaglandin synthetase inhibitors (cat), **250,** 18*P*

Pulmonary vascular resistance, pulmonary vasomotor nerve responses in isolated perfused lungs of *Macaca mulatta* and *Papio* species, **250,** 463

Purkinje cells, effect of intracellular injection of calcium and strontium on cell communication in heart (dog), **250,** 231

Quinine, inhibition of the calcium-induced increase in the potassium permeability of human red blood cells by –, **250,** 32*P*

Receptive fields, the contribution of inhibitory mechanisms to the – properties of neurones in the striate cortex of the cat, **250,** 305

Recording device, adaptation of the George Washington (G.W.) pen recorder for overhead projection, **250,** 6*P*

combination of conventional mechanical kymograph, polythene roll flat-bed transport, electronic pen recorder and over-head projector, **250,** 6*P*

slaving oscillographic recorders for teaching purposes, **250,** 9*P*

Red cells, chloride transport in human –, **250,** 39

chloride and water distribution in human –, **250,** 65

Reflexes, interaction between tonic labyrinth and tonic neck – on the forelimb in the decerebrate cat, **250,** 20*P*

Renal blood flow, the mechanism of acute renal ischaemia caused by adrenalectomy in the rat, **250,** 23

Renal cortical cells, cell electrical potentials during enhanced sodium extrusion in guinea-pig kidney cortex slices, **250,** 559

Renal medulla, medullary cell Na and K concentrations, and water content, during K depletion at 0° C and rewarming: effects of ouabain and ethacrynic acid (rat), **250,** 23*P*

Renin-angiotensin system, the effect of aldosterone and the – on sodium, potassium and chloride transport by proximal and distal rat colon *in vivo*, **250,** 597

Sartorius muscle, the effects of extracellular pH and buffer concentration on the efflux of lactate from frog –, **250,** 1

Sexual difference, comparison of thermal exchanges in men and women under neutral and hot conditions, **250,** 475

Skin, sweat gland function in isolated perfused – (sheep, goat, cattle), **250,** 633

Small intestine, regional differences in the effect of bile salts on absorption by rat – *in vivo*, **250,** 373

Smooth muscle, effects of stimulating the acetylcholine receptor on the current–voltage relationships of the – membrane, studied by voltage-clamp of potential recorded by micro-electrode (guinea-pig), **250,** 175

aerobic and anaerobic metabolism in – cells of taenia coli in relation to active ion transport, **250,** 203

ion influxes during the inhibitory junction potential in the guinea-pig taenia coli, **250,** 681

Sodium efflux, stimulation by aldosterone of the – in barnacle muscle fibres: effects of RNA inhibitors and spironolactone, **250,** 331

Sodium pump, ATP hydrolysis associated with an uncoupled efflux of Na through the Na pump (human), **250,** 33*P*

Sodium transport, effects of changes in the composition of the serosal solution on the electrical properties of the toad urinary bladder epithelium, **250,** 541

the effect of aldosterone and the renin-angiotensin system on sodium potassium and chloride transport by proximal and distal rat colon *in vivo*, **250,** 597

Steroidogenesis, ionic dependence of luteinizing-hormone-induced – in the rabbit ovary, **250,** 669

Striate cortex, the effectiveness of bicuculline as an antagonist of GABA and visually evoked inhibition in the cat's –, **250,** 287

the contribution of inhibitory mechanisms to the receptive field properties of neurones in the – of the cat, **250,** 305

Strontium, effect of intracellular injection of calcium and – on cell communication in heart (dog), **250,** 231

Suckling, factors governing the periodic activation of supraoptic and paraventricular neurosecretory cells during – in the rat, **250,** 443

Superior cervical ganglion, actions of γ-aminobutyric acid on sympathetic ganglion cells (rat), **250,** 85

Surface membrane, the relative contributions of the folds and caveolae to the – of frog skeletal muscle fibres at different sarcomere lengths, **250,** 513

Sweat glands, – function in isolated perfused skin (sheep, goat, cattle), **250,** 633

Synapse formation, reinnervation of rat skeletal muscle in the presence of α-bungarotoxin, **250,** 651

Synaptic transmission, tonic release of transmitter at the neuromuscular junction of the crab, **250,** 275

Tendon organs, the – of cat medial gastrocnemius: significance of motor unit type and size for the activation of Ib afferents, **250**, 491

Tetrodotoxin, the effect of surface charge on the nerve membrane on the action of – and saxitoxin in frog myelinated nerve, **250**, 34*P*

Thermoregulation, the effects of cyclic adenosine-3′,5′-monophosphate and other adenine nucleotides on body temperature (cat), **250**, 143

comparison of thermal exchanges in men and women under neutral and hot conditions, **250**, 475

Thyroxine, effect of adrenal hormones on thyroid secretion and thyroid hormones on adrenal secretion in the sheep, **250**, 261

Transmitter release, binomial analysis of quantal transmitter release at glycerol treated frog neuromuscular junctions, **250**, 121

Urinary bladder, effects of changes in the composition of the serosal solution on the electrical properties of the toad – epithelium, **250**, 541

Vagus, gastric acid and motor responses to electrical stimulation of afferent and efferent fibres in the cat's –, **250**, 17*P*

Vasomotor fibres, pulmonary vasomotor nerve responses in isolated perfused lungs of *Macaca mulatta* and *Papio* species, **250**, 463

Venom, functional denervation of skeletal muscle in the mouse after the local injection of a post-synaptic blocking fraction of *Naja siamensis* –, **250**, 26*P*

Ventrobasal thalamus, characteristics of neurones in the – of the rat which respond to noxious stimulation of the tail, **250**, 29*P*

response of ventrobasal thalamic cells to hair displacement on the face of the waking monkey, **250**, 385

Vision, development of the ipsilateral visual projection in axolotls treated with thyroxine, **250**, 28*P*

the independence of channels in human – selective for direction of movement, **250**, 347

Voltage clamp, effects of stimulating the acetylcholine receptor on the current–voltage relationships of the smooth muscle membrane, studied by – potential recorded by micro-electrode (guinea-pig), **250**, 175

Water transport, regional differences in the effect of bile salts on absorption by rat small intestine *in vivo*, **250**, 373

CONTENTS OF VOLUME 251

No. 1 *September* 1975

PAGE

Reconstruction of the electrical activity of cardiac Purkinje fibres. By R. E. McAllister, D. Noble and R. W. Tsien . . 1

The sinus nerve and baroreceptor input to the medulla of the cat. By J. Lipski, R. M. McAllen and K. M. Spyer 61

Sodium/sodium exchange in the smooth muscle of the guinea-pig taenia coli. By Alison F. Brading 79

Responses of hair cells in the statocyst of *Hermissenda*. By P. B. Detwiler and M. G. F. Fuortes 107

The effect of curare on the release of acetylcholine from mammalian motor nerve terminals and an estimate of quantum content. By P. Fletcher and T. Forrester 131

Horizontal cell responses in the retina of the larval tiger salamander. By A. Lasansky and S. Vallerga 145

Functional properties of ganglion cells of the rhesus monkey retina. By F. M. De Monasterio and P. Gouras 167

Trichromatic colour opponency in ganglion cells of the rhesus monkey retina. By F. M. De Monasterio, P. Gouras and D. J. Tolhurst 197

Concealed colour opponency in ganglion cells of the rhesus monkey retina. By F. M. De Monasterio, P. Gouras and D. J. Tolhurst 217

The effect of 2-deoxy-D-glucose and D-glucose on the efferent discharge rate of sympathetic nerves. By Akira Nijima. . . 231

No. 2 *September* 1975

Voltage dependence of agonist effectiveness at the frog neuromuscular junction: resolution of a paradox. By Vincent E. Dionne and Charles F. Stevens 245

Effect of ascorbic acid on histamine metabolism in scorbutic guinea-pigs. By I. B. Chatterjee, S. Das Gupta, A. K. Majumder, B. K. Nandi and N. Subramanian 271

The role of the kidney in the inactivation of injected [^{125}I] kallikrein. By IVOR H. MILLS, CORDELIA L. PATERSON and P. E. WARD 281

Metabolic changes associated with the slowing of relaxation in fatigued mouse muscle. By R. H. T. EDWARDS, D. K. HILL and D. A. JONES 287

Heat production and chemical changes during isometric contractions of the human quadriceps muscle. By R. H. T. EDWARDS, D. K. HILL and D. A. JONES 303

Some differences in contractile responses of isolated longitudinal and circular muscle from the guinea-pig stomach. By HIROSI KURIYAMA, KAZUO MISHIMA and HIKARU SUZUKI 317

The relative unimportance of the temporal pattern of the primary afferent input in determining the mean level of motor firing in the tonic vibration reflex. By P. B. C. MATTHEWS . . . 333

Autonomic nerve stimulation, kallikrein content and acinar cell granules of the cat's submandibular gland. By SUSANNE BARTON, E. J. SANDERS, M. SCHACHTER and M. UDDIN 363

Effect of steroid depletion on the response of toad bladder to vasopressin. By E. S. DEBNAM, S. HEWITT and R. S. SNART . . 371

Gas transit times in the pig lung. By A. DAVIES . . . 383

Localization and electrical characteristics of a giant synapse in the spinal cord of the lamprey. By G. L. RINGHAM . . . 395

Synaptic transfer at a vertebrate central nervous system synapse. By A. R. MARTIN and G. L. RINGHAM 409

Post-synaptic potentiation: interaction between quanta of acetylcholine at the skeletal neuromuscular synapse. By H. CRISS HARTZELL, STEPHEN W. KUFFLER and DOJU YOSHIKAMI . . 427

The number of transmitter molecules in a quantum: an estimate from iontophoretic application of acetylcholine at the neuromuscular synapse. By STEPHEN W. KUFFLER and DOJU YOSHIKAMI 465

The responses of muscle spindles in sheep extraocular muscles. By J. S. BROWNE 483

Synaptic actions on mitral and tufted cells elicited by olfactory nerve volleys in the rabbit. By THOMAS V. GETCHELL and GORDON M. SHEPHERD. 497

Short-axon cells in the olfactory bulb: dendrodendritic synaptic interactions. By THOMAS V. GETCHELL and GORDON M. SHEPHERD 523

Intracellular chloride activity in frog heart. By R. O. LADLE and J. L. WALKER 549

Gradation of the reflex response from atrial receptors. By C. T. KAPPAGODA, R. J. LINDEN and D. A. S. G. MARY 561

No. 3 *October* 1975

Cortical and long spinal actions on lumbosacral motoneurones in the cat. By M. AOKI and A. K. MCINTYRE 569

Initial and delayed membrane currents in crab muscle fibre under voltage-clamp conditions. By YVONNE MOUNIER and GUY VASSORT 589

Evidence for a transient potassium membrane current dependent on calcium influx in crab muscle fibre. By YVONNE MOUNIER and GUY VASSORT 609

Myocardial sarcomere dynamics during isometric contraction. By JOHN W. KRUEGER and GERALD H. POLLACK 627

Breathing in man during steady-state exercise on the bicycle at two pedalling frequencies, and during treadmill walking. By J. D. S. KAY, E. STRANGE PETERSEN and H. VEJBY-CHRISTENSEN. . 645

Mean and breath-by-breath pattern of breathing in man during steady-state exercise. By J. D. S. KAY, E. STRANGE PETERSEN and H. VEJBY-CHRISTENSEN 657

Quantitative aspects of ouabain binding to human erythrocyte and cardiac membranes. By ERLAND ERDMANN and WERNER HASSE 671

Influence of activity on the passive electrical properties of denervated soleus muscle fibres in the rat. By R. H. WESTGAARD . 683

Characteristics of gastric inhibition by acidification of oxyntic gland area. By STANISLAW J. KONTUREK, WOJCIECH OBTULOWICZ and JANINA TASLER 699

The effect of zinc ions on the gating of the delayed potassium conductance of frog sartorius muscle. By P. R. STANFIELD . . 711

Evidence against a physiological role of prostaglandins in the regulation of noradrenaline release in the cat spleen. By MARGARITA L. DUBOCOVICH and S. Z. LANGER 737

Secretory activity of goat mammary glands during pregnancy and the onset of lactation. By I. R. Fleet, Jane A. Goode, Maureen H. Hamon, M. S. Laurie, J. L. Linzell and M. Peaker . . 763

The interaction of pH and divalent cations at the neuromuscular junction. By E. M. Landau and D. A. Nachshen . . . 775

Selective and non-selective reinnervation of fast-twitch and slow-twitch rat skeletal muscle. By J. F. Y. Hoh 791

Binding of adenosine diphosphate to intact human platelets. By G. V. R. Born and H. Feinberg 803

Some effects of 5-hydroxytryptamine, dopamine and noradrenaline on neurones in the submucous plexus of guinea-pig small intestine. By G. D. S. Hirst and E. M. Silinsky . . . 817

Responses of neurones in motor cortex and in area 3A to controlled stretches of forelimb muscles in Cebus monkeys. By G. E. Lucier, D. C. Rüegg and M. Wiesendanger . . . 833

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

SUBJECT INDEX

Acetylcholine, voltage dependence of agonist effectiveness at the frog neuromuscular junction: resolution of a paradox, **251**, 245

Acetylcholine molecules, the number of transmitter molecules in a quantum: an estimate from iontophoretic application of acetylcholine at the neuromuscular synapse (frog, snake), **251**, 465

Acetylcholine release, the effect of curare on the release of acetylcholine from mammalian motor nerve terminals and an estimate of quantum content (rat), **251**, 131

the interaction of pH and divalent cations at the neuromuscular junction, **251**, 775

Action potential, reconstruction of the electrical activity of cardiac Purkinje fibres, **251**, 1

calcium-dependent – in the cell body of an insect motoneurone **251**, 62*P*

Adenosine diphosphate, binding of – to intact human platelets, **251**, 803

Afferents, cortical and long spinal actions on lumbosacral motoneurones in the cat, **251**, 569

Ascorbic acid, effect of – on histamine metabolism in scorbutic guinea-pigs, **251**, 271

Atrial receptors, responses of type A atrial vagal receptors to changes in atrial dynamics (cat), **251**, 36*P*

gradation of the reflex response from – (dog), **251**, 561

Autonomic nervous system, autonomic nerve stimulation, kallikrein content and acinar cell granules of the cat's submandibular gland, **251**, 363

Bladder, effect of steroid depletion on the response of toad – to vasopressin, **251**, 371

Blood flow, antidromic dilatation in skeletal muscle (cat), **251**, 18*P*

total and capillary – through the testes of anaesthetized rams, **251**, 19*P*

– in the lower leg during recovery from fractures of the tibia and fibula, **251**, 22*P*

Brain, a simple method for the dissection of discrete nuclei from fresh brains of rats or cats, **251**, 4*P*

Brain temperature, a brain thermode unit for use in oxen, **251**, 1*P*

Breathing pattern, the form of the respiratory interaction between an alternate-breath oscillation of P_{A,CO_2} and hypoxia in man, **251**, 37*P*

the pattern of stimulated breathing in man during non-elastic expiratory loading, **251**, 40*P*

breathing in man during steady-state exercise on the bicycle at two pedalling frequencies and during treadmill walking, **251**, 645

mean and breath-by-breath pattern of breathing in man during steady-state exercise, **251**, 657

Calcium pump, some differences in contractile responses of isolated longitudinal and circular muscle from the guinea-pig stomach, **251**, 317

Cardiac muscle, intracellular chloride activity in frog heart, **251**, 549

myocardial sarcomere dynamics during isometric contraction (rat), **251**, 627

Cardiac Purkinje fibres, reconstruction of the electrical activity of –, **251**, 1

Cardiovascular function, changes in aerobic power in patients undergoing elective surgery, **251**, 42*P*

Carotid arterial pH, the effects of abnormal oxygen tensions on breath by-breath tidal volume changes in cats alternately breathing CO_2-rich and CO_2-free gas mixtures, **251**, 38*P*

Catecholamines, some effects of 5-hydroxytryptamine, dopamine and noradrenaline on neurones in the submucous plexus of guinea-pig small intestine, **251**, 817

Cations, the behaviour of isolated cell nuclei when divalent – are removed (chicken, pig), **251**, 23*P*

Cell nuclei, the behaviour of isolated – when divalent cations are removed (chicken, pig), **251**, 23*P*

Cell transport, Na-dependent phosphate transport in cultured cells, **251**, 58*P*

Cerebral blood flow, the measurement of – in the rat by ^{85}krypton washout, **251**, 16*P*

changes in intracranial pressure during brief exposure to hypoxia in anaesthetized cats, **251**, 41*P*

Chemical stimulation, characteristics of gastric inhibition by acidification of oxyntic gland area, **251,** 699
Chloride activity, intracellular – in frog heart, **251,** 549
Colour vision, grey squirrel dichromatic – shown by flicker photometry, **251,** 47*P*
trichromatic colour opponency in ganglion cells of the rhesus monkey retina, **251,** 197
Conduction velocity, conduction velocities of axons supplying muscles chronically tenotomized during growth in rats, **251,** 51*P*
the responses of muscle spindles in sheep extraocular muscles, **251,** 483
Crustacean muscle, filament lengths and the constant volume behaviour of the filament lattice in a –, **251,** 68*P*
Crustacean neuromuscular junction, glutamate 'noise' at the excitatory neuromuscular junctions of a crustacean, **251,** 73*P*

Denervated muscle fibres, influence of activity on the passive electrical properties of denervated soleus muscle fibres in the rat, **251,** 683

Efferents, pinna reflex γ-efferents in the conduction velocity spectrum to hindlimb muscles in the rat, **251,** 50*P*
Elastin, the influence of various cations on the elastic modulus of purified –, **251,** 57*P*
Electromyography, the relative unimportance of the temporal pattern of the primary afferent input in determining the mean level of motor firing in the tonic vibration reflex (cat), **251,** 333
End-plate current, voltage dependence of agonist effectiveness at the frog neuromuscular junction: resolution of a paradox, **251,** 245
the interaction of pH and divalent cations at the neuromuscular junction, **251,** 775
Energy, the additional mechanical – delivered by the contractile component of the previously stretched muscle, **251,** 65*P*
Erythrocytes, quantitative aspects of ouabain binding to human – and cardiac membranes, **251,** 671
Exercise, feed-back induced muscular –, **251,** 6*P*
the effect of dietary modifications on blood lactate during –, **251,** 34*P*
breathing in man during steady-state – on the bicycle at two pedalling frequencies and during treadmill walking, **251,** 645
mean and breath-by-breath pattern of breathing in man during steady-state –, **251,** 657
Exchange diffusion, sodium/sodium exchange in the smooth muscle of the guinea-pig taenia coli, **251,** 79
Excitation-contraction coupling, some differences in contractile responses of isolated longitudinal and circular muscle from the guinea-pig stomach, **251,** 317
Extraocular muscles, the responses of muscle spindles in sheep –, **251,** 483

Fatigue, metabolic changes associated with the slowing of relaxation in fatigued mouse muscle, **251,** 287

Gall bladder, the effect of biliary obstruction on the concentrating activity of the rabbit –, **251,** 33*P*
Gastric acid secretion, stimulation and inhibition of acid secretion from the rat isolated gastric mucosa, **251,** 11*P*
characteristics of gastric inhibition by acidification of oxyntic gland area (dog), **251,** 699
Gastric emptying, electrical vagal-induced gastric antral contractions and – of a liquid test meal in anaesthetized cats **251,** 14*P*
Gastric motility, the effects of pentagastrin on gastric (abomasal) motility in the unweaned calf, **251,** 12*P*
Gastrin, characteristics of gastric inhibition by acidification of oxyntic gland area (dog), **251,** 699
Gills, analysis of the gas exchange function of the – in an elasmobranch fish, *Scyliorhinus stellaris*, **251,** 44*P*
Glucose, the effect of 2-deoxy-D-glucose and D-glucose on the efferent discharge rate of sympathetic nerves (rabbit), **251,** 231
Glutamate, –'noise' at the excitatory neuromuscular junctions of a crustacean, **251,** 73*P*

Heart rate, gradation of the reflex responses from atrial receptors (dog), **251,** 561
Heat production, – and chemical changes during isometric contractions of the human quadriceps muscle, **251,** 303
HeLa cells, measurement of membrane potential in –, **251,** 9*P*

Histamine metabolism, effect of ascorbic acid on – in scorbutic guinea-pigs, **251**, 271
Horizontal cells, – responses in the retina of the larval tiger salamander, **251**, 271
Hydrogen ions, the interaction of pH and divalent cations at the neuromuscular junction, **251**, 775
Hyperthermia, morphine –, prostaglandin synthetase inhibitors and naloxone (cat), **251**, 27*P*

Inhibitory potentials, some effects of 5-hydroxytryptamine, dopamine and noradrenaline on neurones in the submucous plexus of guinea-pig small intestine, **251**, 817
Isometric contraction, heat production and chemical changes during – of the human quadriceps muscle, **251**, 303
myocardial sarcomere dynamics during – (rat), **251**, 627

Kallikrein, the role of the kidney in the inactivation of injected [^{125}I]-(rabbit) **251**, 281
autonomic nerve stimulation, – content and acinar cell granules of the cat's submandibular gland, **251**, 363
Kidney, the role of the – in the inactivation of injected [^{125}I]kallikrein (rabbit), **251**, 281

Lactate, the effect of dietary modifications on blood – during exercise, **251**, 34*P*
Lactogenesis, secretory activity of goat mammary glands during pregnancy and the onset of lactation, **251**, 763
Lamprey, localization and electrical characteristics of a giant synapse in the spinal cord of the –, **251**, 395
synaptic transfer at a vertebrate central nervous system synapse, **251**, 409
Limb injury, blood flows in the lower leg during recovery from fractures of the tibia and fibula, **251**, 22*P*
Lithium, action of – on the responses of the rat superior mesenteric vascular bed to noradrenaline and prolactin, **251**, 24*P*
the lack of relationship between the concentration of – and the inhibition of the action of vasopressin by lithium in the rat, **251**, 28*P*
Liver extract, characteristics of gastric inhibition by acidification of oxyntic gland area (dog), **251**, 699
Lung, gas transit times in the pig –, **251**, **363**

Mammary gland, secretory activity of goat – during pregnancy and the onset of lactation, **251**, 763
Mechanoreceptors, responses of hair cells in the statocyst of *Hermissenda*, **251**, 107
Medullary neurones, the sinus nerve and baroreceptor input to the medulla of the cat, **251**, 61
Membrane, quantitative aspects of ouabain binding to human erythrocyte and cardiac – **251**, 671
Membrane currents, initial and delayed – in crab muscle fibre under voltage-clamp conditions, **251**, 589
Membrane potential, measurement of – in HeLa cells, **251**, 9*P*
Membrane properties, influence of activity on the passive electrical properties of denervated soleus muscle fibres in the rat, **251**, 683
Micro-electrodes, intracellular chloride activity in frog heart, **251**, 549
Mitral cell, synaptic actions on mitral and tufted cells elicited by olfactory nerve volleys in the rabbit, **251**, 497
Molluscan neurones, synaptic connexions of serotonin-containing neurones in *Planorbis corneus*, **251**, 2*P*
Morphine, – hyperthermia, prostaglandin synthetase inhibitors and naloxone (cat), **251**, 27*P*
Motoneurones, cortical and long spinal actions on lumbosacral – in the cat, **251**, 569
Motor cortex, responses of neurones in – and in area 3A to controlled stretches of forelimb muscles in Cebus monkeys, **251**, 833
Muscle activity, influence of activity on the passive electrical properties of denervated soleus muscle fibres in the rat, **251**, 683
Muscle afferents, crossed reflex actions of group I – (cat), **251**, 53*P*
Muscle fibres, initial and delayed membrane currents in crab – under voltage-clamp conditions, **251**, 589
evidence for a transient potassium membrane current dependent on calcium-influx in crab –, **251**, 609
the effect of zinc ions on the gating of the delayed potassium conductance of frog sartorius muscle, **251**, 711
Muscle length, tension responses and sarcomere movements during length changes applied to contracting frog's muscle, **251**, 66*P*

Muscle metabolism, metabolic changes associated with the slowing of relaxation in fatigued mouse muscle, **251**, 287
heat production and chemical changes during isometric contractions of the human quadriceps muscle, **251**, 303
Muscle spindles, the responses of – in sheep extraocular muscles, **251**, 483
responses of neurones in motor cortex and in area 3A to controlled stretches of forelimb muscles in Cebus monkeys, **251**, 833
Muscle stretch, responses of neurones in motor cortex and in area 3A to controlled stretches of forelimb muscles in Cebus monkeys, **251**, 833

Nerve terminals, nerve-terminal specializations in the central nervous system of *Planorbis corneus*, **251**, 3*P*
a quantitative study of horseradish peroxidase uptake by boutons presynaptic to axotomized hypoglossal neurones (rat), **251**, 55*P*
Neural recording, apparatus for intracellular recording from excitable cells subjected to high hydrostatic pressure (Helix), **251**, 7*P*
Neuromuscular junction, voltage dependence of agonist effectiveness at the frog – resolution of a paradox, **251**, 245
post-synaptic potentiation: interaction between quanta of acetylcholine at the skeletal – (snake) **251**, 427
the number of transmitter molecules in a quantum: an estimate from iontophoretic application of acetylcholine at the neuromuscular synapse (frog, snake) **251**, 465
Noradrenaline, action of lithium on the responses of the rat superior mesenteric vascular bed to – and prolactin, **251**, 24*P*
Noradrenaline release, evidence against a physiological role of prostaglandins in the regulation of – in the cat spleen, **251**, 737

Olfactory bulb, short-axon cells in the –, dendrodendritic synaptic interactions (rabbit), **251**, 523
Olfactory nerve, synaptic actions on mitral and tufted cells elicited by – volleys in the rabbit, **251**, 497
Ouabain, the influence of low doses of – and potassium ions on sheep Purkinje fibre contractility, **251**, 69*P*
Ouabain binding, quantitative aspects of – to human erythrocyte and cardiac membrane, **251**, 671
Oxygen binding, effect of age on oxygen binding to haemoglobin, **251**, 45*P*

Pacemaker, reconstruction of the electrical activity of cardiac Purkinje fibres, **251**, 1
Permeability, the role of the kidney in the inactivation of injected [^{125}I]kallikrein (rabbit), **251**, 281
Peroxidase, a quantitative study of horseradish – uptake by boutons presynaptic to axotomised hypoglossal neurones (rat), **251**, 55*P*
Pinna reflex, – activated γ-efferents in the conduction velocity spectrum to hind-limb muscles in the rat, **251**, 50*P*
Platelets, binding of adenosine diphosphate to intact human –, **251**, 803
Post-synaptic potentiation, –: interaction between quanta of acetylcholine at the skeletal neuromuscular synapse (snake), **251**, 427
Potassium, the effect of dietary K^+ depletion and subsequent repletion on intracellular K^+ concentration and pH of cardiac and skeletal muscle in rabbits, **251**, 70*P*
Potassium conductance, the effect of zinc ions on the gating of the delayed – of frog sartorius muscle, **251**, 711
Potassium current, evidence for a transient potassium membrane current dependent on calcium-influx in crab muscle fibre, **251**, 609
Pregnancy, secretory activity of goat mammary glands during – and the onset of lactation, **251**, 763
Pressure, apparatus for intracellular recording from excitable cells subjected to high hydrostatic – (Helix), **251**, 7*P*
Prolactin, action of lithium on the responses of the rat superior mesenteric vascular bed to noradrenaline and –, **251**, 24*P*
the effects of – on renal excretion and on voluntary intake of water and sodium in rabbits, **251**, 30*P*
Prostaglandin, the effect of curare on the release of acetylcholine from mammalian motor nerve terminals and an estimate of quantum content (rat), **251**, 131

Prostaglandin E_2, stimulation and inhibition of acid secretion from the rat isolated gastric mucosa, **251**, 11*P*
evidence against a physiological role of prostaglandins in the regulation of noradrenaline release in the cat spleen, **251**, 737
Purkinje fibres, the influence of low doses of ouabain and potassium ions on sheep – contractility, **251**, 69*P*

Receptive field properties, horizontal cell responses in the retina of the larval tiger salamander, **251**, 145
Receptive fields, functional properties of ganglion cells of the rhesus monkey retina, **251**, 167
Reflex, gradation of the – response from atrial receptors (dog), **251**, 561
Reinnervation, selective and non-selective – of fast-twitch and slow-twitch rat skeletal muscle, **251**, 791
Relaxation, metabolic changes associated with the slowing of – in fatigued mouse muscle, **251**, 287
Renal blood flow, regional – in the hypothermic rat and dog, **251**, 20*P*
Renin-angiotensin system, the failure of peripheral renin-angiotensin activation to induce sodium appetite (rat), **251**, 31*P*
Respiratory rate, mean and breath-by-breath pattern of breathing in man during steady-state exercise, **251**, 657
Respiring tissue, measurement of diffusivity of O_2 and CO_2 in respiring tissues: results in rat skeletal muscle, **251**, 44*P*
Retina, horizontal cell responses in the retina of the larval tiger salamander, **251**, 145
Retinal ganglion cells, functional properties of ganglion cells of the rhesus monkey retina, **251**, 167
trichromatic colour opponency in ganglion cells of the rhesus monkey retina, **251**, 197
concealed colour opponency in ganglion cells of the rhesus monkey retina, **251**, 217
Retractor penis, extraction from ox – of an inhibitory substance which mimics its atropine-resistant neurogenic relaxation, **251**, 54*P*

Salivary gland, autonomic nerve stimulation, kallikrein content and acinar cell granules of the cat's submandibular gland, **251**, 363
Salivary secretion, reflex inhibition of parotid – from the portal venous system of sheep, **251**, 15*P*
Sarcomere length, myocardial sarcomere dynamics during isometric contraction, (rat) **251**, 627
Sarcomere movements, apparatus for investigating – in contracting frog's muscle during servo-controlled length changes, **251**, 8*P*
Sinus nerve, the – and baroreceptor input to the medulla of the cat, **251**, 61
Skeletal muscle, antidromic dilatation in – (cat), **251**, 18*P*
some effects of 2,4-dinitrophenol (2,4-DNP) on the electrical properties of the frog – membrane, **251**, 59*P*
the effect of dietary K^+ depletion and subsequent repletion on intracellular K^+ concentration and pH of cardiac and – in rabbits, **251**, 70*P*
Skeletal muscle fibres, post-synaptic potentiation: interaction between quanta of acetylcholine at the skeletal neuromuscular synapse (snake), **251**, 427
selective and non-selective reinnervation of fast-twitch and slow-twitch rat skeletal muscle, **251**, 791
Sliding filament mechanism, some considerations favouring the electrostatic as opposed to the physical cross-link theory of cross-projection action in striated muscle, **251**, 63*P*
Smooth muscle, sodium/sodium exchange in the – of the guinea-pig taenia coli, **251**, 79
some differences in contractile responses of isolated longitudinal and circular muscle from the guinea-pig stomach, **251**, 317
Sodium appetite, the failure of peripheral renin-angiotensin activation to induce – (rat), **251**, 31*P*
Sodium fluxes, sodium/sodium exchange in the smooth muscle of the guinea-pig taenia coli, **251**, 79
Sodium transport, effect of steroid depletion on the response of toad bladder to vasopressin, **251**, 371
quantitative aspects of ouabain binding to human erythrocyte and cardiac membranes, **251**, 671
Soleus muscle, the relative unimportance of the temporal pattern of the primary afferent input in determining the mean level of motor firing in the tonic vibration reflex (cat), **251**, 333

Spinal action, cortical and long – on lumbosacral motoneurones in the cat, **251**, 569
Spinal cord, localization and electrical characteristics of a giant synapse in the – of the lamprey, **251**, 395
Spleen, evidence against a physiological role of prostaglandins in the regulation of noradrenaline release in the cat –, **251**, 737
Squid giant axon, effects of 4-aminopyridine on the potassium current in internally perfused giant axons of the squid, **251**, 60*P*
Statocyst, responses of hair cells in the – of *Hermissenda*, **251**, 107
Stereotaxic instrument, a stereotaxic device and head clamp for use in large animal surgery, **251**, 1*P*
Stretch receptors, dynamic properties of – in the trachea of the dog, **251**, 46*P*
Submucous plexus neurones, some effects of 5-hydroxytryptamine, dopamine and noradrenaline on neurones in the submucous plexus of guinea-pig small intestine, **251**, 817
Surface charge, evidence for a transient potassium membrane current dependent on calcium-influx in crab muscle fibres, **251**, 609
Sympathetic nerve, the effect of 2-deoxy-D-glucose and D-glucose on the efferent discharge rate of sympathetic nerves (rabbit), **251**, 231
Synapse, localization and electrical characteristics of a giant – in the spinal cord of the lamprey, **251**, 395
Synaptic interactions, short-axon cells in the olfactory bulb: dendrodendritic synaptic interactions (rabbit), **251**, 523
Synaptic transmission, synaptic transfer at a vertebrate central nervous system synapse (lamprey), **251**, 409

Testis, total and capillary blood flow through the testes of anaesthetized rams, **251**, 19*P*
Thalamic neurones, specificity of nuciferine as an antagonist of amino acid and synaptically evoked activity in cells of the feline thalamus, **251**, 25*P*
Tidal volume, the effects of abnormal oxygen tensions on breath-by-breath – changes in cats alternately breathing CO_2-rich and CO_2-free gas mixtures, **251**, 38*P*
breathing in man during steady-state exercise on the bicycle at two pedalling frequencies, and during treadmill walking, **251**, 645
Trachea, dynamic properties of stretch receptors in the – of the dog, **251**, 46*P*
Transmitter-quantal release, the number of transmitter molecules in a quantum: an estimate from iontophoretic application of acetylcholine at the neuromuscular synapse (frog, snake), **251**, 465
Transmitters, cellular uptake of – and transmitter precursors in ganglia of *Planorbis corneus*, **251**, 72*P*
Tubocurarine, the effect of curare on the release of acetylcholine from mammalian motor nerve terminals and an estimate of quantum content (rat), **251**, 131

Vasopressin, the lack of relationship between the concentration of lithium and the inhibition of the action of – by lithium in the rat, **251**, 28*P*
effect of steroid depletion on the response of toad bladder to –, **251**, 371
Ventilation, gas transit times in the pig lung, **251**, 383
Vibration reflex, the relative unimportance of the temporal pattern of the primary afferent input in determining the mean level of motor firing in the tonic – (cat), **251**, 333
Visual cortical cells, absence of spontaneous variability of orientational and directional tuning in cat –, **251**, 49*P*
Visual pigments, the visual pigments of the grey squirrel, *Sciurus carolinensis leucotis*, **251**, 47*P*
Visual stimuli, concealed colour opponency in ganglion cells of the rhesus monkey retina, **251**, 217
Voltage clamp, initial and delayed membrane currents in crab muscle fibres under – conditions, **251**, 589

Zinc, the effect of – ions on the gating of the delayed potassium conductance of frog sartorius muscle, **251**, 711

CONTENTS OF VOLUME 252

No. 1 *October* 1975

PAGE

Simultaneous measurements of magnesium, calcium and sodium influxes in perfused squid giant axons under membrane potential control. By E. Rojas and R. E. Taylor 1

Transfer of fatty acids across the rabbit placenta. By M. C. Elphick, D. G. Hudson and D. Hull 29

Effect of insulin upon membrane-bound ($Na^+ + K^+$)-ATPase extracted from frog skeletal muscle. By Wayne A. Gavryck, Richard D. Moore and Roger C. Thompson 43

The aortic arch baroreceptor response to static and dynamic stretches in an isolated aorta-depressor nerve preparation of cats *in vitro*. By J. O. Arndt, A. Dörrenhaus and H. Wiecken . 59

A comparison of radioactive thallium and potassium fluxes in the giant axon of the squid. By D. Landowne 79

The effect of saline and hyperoncotic dextran infusion on canine ileal salt and water absorption and regional blood flow. By D. Mailman and K. Jordan 97

Extracellular potassium activity, intracellular and extracellular potential responses in the spinal cord. By E. W. Lothman and G. G. Somjen 115

Readjustment of retinotectal projection following reimplantation of a rotated or inverted tectal tissue in adult goldfish. By Myong G. Yoon 137

The influence of pH on equilibrium effects of tetrodotoxin on myelinated nerve fibres of *Rana esculenta*. By W. Ulbricht and H.-H. Wagner 159

The influence of pH on the rate of tetrodotoxin action on myelinated nerve fibres. By W. Ulbricht and H.-H. Wagner . . 185

The formation of synapses in amphibian striated muscle during development. By M. R. Bennett and A. G. Pettigrew . . 203

The actions of volatile anaesthetics on synaptic transmission in the dentate gyrus. By C. D. Richards and Ann E. White . . 241

PAGE

Impulse activity and receptor potential of primary and secondary endings of isolated mammalian muscle spindles. By C. C. HUNT and D. OTTOSON 259

A correlation between the effects of anti-mitotic drugs on microtubule assembly *in vitro* and the inhibition of axonal transport in noradrenergic neurones. By P. BANKS and R. TILL 283

Ionic mechanism of the excitatory synaptic membrane of the crayfish neuromuscular junction. By KAYOKO ONODERA and A. TAKEUCHI 295

No. 2 *October* 1975

Mechanical properties of frog skeletal muscles in iodoacetic acid rigor. By M. J. MULVANY 319

Mechanism of action of pentagastrin and acetylcholine in the longitudinal muscle of the canine antrum. By J. H. SZURSZEWSKI 335

Calcium and stimulus-secretion coupling in the adrenal medulla: contrasting stimulating effects of the ionophores X-537A and A23187 on catecholamine output. By D. E. COCHRANE, W. W. DOUGLAS, T. MOURI and Y. NAKAZATO 363

Secretion of electrolytes by the pancreas of the anaesthetized rat. By W. A. SEWELL and J. A. YOUNG 379

Cinematographic analysis of contractile events produced in intrafusal muscle fibres by stimulation of static and dynamic fusimotor axons. By P. BESSOU and B. PAGÈS 397

Functional and structural changes in mammalian sympathetic neurones following interruption of their axons. By DALE PURVES 429

Differentiation of motoneurones and skeletal muscles in kittens. By P. HUIZAR, M. KUNO and Y. MIYATA 465

Inhibition of thermal tachypnoea in rabbits following exposure to cold and water deprivation. By M. MASKREY and S. C. NICOL . 481

Discrete and discontinuous action of brown widow spider venom on the presynaptic nerve terminals of frog muscle. By J. DEL CASTILLO and D. W. PUMPLIN 491

Effects of external ions on the synaptic transmission from photoreceptors to horizontal cells in the carp retina. By A. KANEKO and H. SHIMAZAKI 509

PAGE

Potassium-induced increase in oxygen consumption of brown adipose tissue from the rat. By Y. A. Barde, A. Chinet and L. Girardier 523

An alkyl etherase in rat liver. By R. A. Peters and M. Shorthouse 537

No. 3 *November* 1975

Some electrical and mechanical effects of strontium on toad ventricular muscle: comparison to calcium. By B. G. Bass, E. M. Ciulla, P. Klop and S. Van Baal 547

Neural systems responsible for the gastric secretion provoked by 2-deoxy-D-glucose cytoglucopoenia. By Massako Kadekaro, C. Timo-Iaria and L. E. R. Valle 565

Two mechanisms for the meperidine block of action potential production in frog's skeletal muscle; non-specific and opiate drug receptor mediated blockade. By George B. Frank 585

Further studies on the control of ACh sensitivity by muscle activity in the rat. By T. Lømo and R. H. Westgaard . . 603

Contrast constancy: deblurring in human vision by spatial frequency channels. By M. A. Georgeson and G. D. Sullivan . 627

Neurotrophic regulation of dynamic properties of skeletal muscle: effects of botulinum toxin and denervation. By D. B. Drachman and D. M. Johnston 657

Sensitive osmometer function of juxtaglomerular cells *in vitro*. By O. Frederiksen, P. P. Leyssac and S. L. Skinner . . 669

Effects of fasting and semi-starvation on the kinetics of active and passive sugar absorption across the small intestine *in vivo*. By E. S. Debnam and R. J. Levin 681

The mechanisms of action of chloromercuribenzene-*P*-sulphonic acid as insulin secretagogue: fluxes of calcium, sodium and rubidium in islets exposed to mercurial and a membrane-active antagonist. By B. Hellman, J. Sehlin, M. Söderberg and I.-B. Täljedal . 701

Voltage-clamp analysis of transmembrane ionic currents in guinea-pig myometrium: evidence for an initial potassium activation triggered by calcium influx. By Guy Vassort . . . 713

Interactions of rod and cone signals in the mudpuppy retina. By Gordon L. Fain 735

PAGE

Loss of α-bungarotoxin from junctional and extrajunctional acetylcholine receptors in rat diaphragm muscle *in vivo* and in organ culture. By DARWIN K. BERG and ZACH W. HALL . . 771

The influence of secretin on the secretion of pepsin in response to acid stimulants in the anaesthetized cat. By JOAN M. BRAGANZA, A. C. C. GIBBS and HENRY T. HOWAT 791

Micro-electrode measurement of the internal pH of crab muscle fibres. By C. CLAIRE AICKIN and R. C. THOMAS 803

The stages of osmotic haemolysis. By A. W. L. JAY and S. ROWLANDS 817

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

18–19 *July* 1975

SUBJECT INDEX

Absorption, the effect of saline and hyperoncotic dextran infusion on canine ileal salt and water – and regional blood flow, **252,** 97
effects of fasting and semi-starvation on the kinetics of active and passive sugar – across the small intestine *in vivo* (rat), **252,** 681
Acetylcholine, mechanism of action of pentagastrin and – on the longitudinal muscle of the canine antrum, **252,** 335
further studies on the control of ACh sensitivity by muscle activity in the rat, **252,** 603
Acetylcholine receptor, fluorescent staining of – in living muscle cells (*Xenopus*), **252,** 63*P*
loss of α-bungarotoxin from junctional and extrajunctional – in rat diaphragm muscle *in vivo* and in organ culture, **252,** 771
Acid secretion, the *in vivo* metabolism of [^{14}C] histamine during pentagastrin-stimulated – in the cat, **252,** 75*P*
Acid stimulants, the influence of secretin on the secretion of pepsin in response to – in the anaesthetized cat, **252,** 791
Action potential, two mechanisms for the meperidine block of – production in frog's skeletal muscle; non-specific and opiate drug receptor mediated blockade, **252,** 585
Adrenal medulla, calcium and stimulus-secretion coupling in the –: contrasting stimulating effects of the ionophores X-537A and A23187 on catecholamine output (cat), **252,** 363
Afferent sympathetic fibres, afferent sympathetic nerve fibres with aortic endings (cat), **252,** 45*P*
After potential, the – and the electrogenic potential in rat C nerve fibres, **252,** 71*P*
Airways-closure, assessment of closure of lung units based on the pressure-volume curve, **252,** 30*P*
Alkyl etherase, an – in rat liver, **252,** 537
4-Aminopyridine, the actions of – on the delayed potassium current in skeletal muscle fibres (frog), **252,** 70*P*
Ammonia, comparison of effects of – and CS aerosol upon exercise ventilation and cardiac frequency in healthy men, **252,** 28*P*
Anaesthetics, the actions of volatile – on synaptic transmission in the dentate gyrus (guinea-pig), **252,** 241
Angiotensin, the involvement of protein synthesis in the actions of – on fluid transport by rat jejunum *in vivo*, **252,** 78*P*
Aorta, the aortic arch baroreceptor response to static and dynamic stretches in an isolated – depressor nerve preparation of cats *in vitro*, **252,** 59
Aortic blood flow, an instability mechanism relevant to flow in the aorta, **252,** 9*P*
flow in the aorta, **252,** 10*P*
Aortic mechanoreceptors, the aortic arch baroreceptor response to static and dynamic stretches in an isolated aorta-depressor nerve preparation of cats *in vitro*, **252,** 59
Axonal transport, transport of cholinergic enzymes in regenerating peripheral nerve (rabbit), **252,** 62*P*
a correlation between the effects of anti-mitotic drugs on microtubule assembly *in vitro* and the inhibition of – in noradrenergic neurones (cat), **252,** 283
Axotomy, functional and structural changes in mammalian sympathetic neurones following interruption of their axons (guinea-pig), **252,** 429

Bicarbonate, secretion of electrolytes by the pancreas of the anaesthetized rat, **252,** 379
Blood pressure control, learned voluntary control of diastolic pressure and circulatory effects of attempted muscle contraction in severely paralysed patients, **252,** 67*P*
Botulinum toxin, neurotrophic regulation of dynamic properties of skeletal muscle: effects of – and denervation (rat), **252,** 657
Brown fat, potassium-induced increase in oxygen consumption of brown adipose tissue from the rat, **252,** 523
Bungarotoxin, loss of α-bungarotoxin from junctional and extrajunctional acetylcholine receptors in rat diaphragm muscle *in vivo* and in organ culture, **252,** 771

Calcium, – and stimulus-secretion coupling in the adrenal medulla: contrasting stimulating effects of the ionophores X-537A and A23187 on catecholamine output (cat), **252,** 363
discrete and discontinuous action of brown widow spider venom on the presynaptic nerve terminals of frog muscle, **252,** 491
some electrical and mechanical effects of strontium on toad ventricular muscle: comparison to –, **252,** 547
the mechanisms of action of chloromercuribenzene-*p*-sulphonic acid as insulin secretagogue: fluxes of –, sodium and rubidium in islets exposed to mercurial and a membrane-active antagonist (mouse), **252,** 701
voltage-clamp analysis of transmembrane ionic currents in guinea-pig myometrium: evidence for an initial potassium activation triggered by – influx, **252,** 73
Calcium fluxes, simultaneous measurements of magnesium, calcium and sodium influxes in perfused squid giant axons under membrane potential control, **252,** 1
Calcium transport, – and Ca pump reversal in human red blood cells, **252,** 86*P*
Capillary permeability, some observations upon the rate of labelling of endothelial vesicles by ferritin in frog mesenteric capillaries, **252,** 79*P*
Carbon dioxide, effect of airway anaesthesia on the ventilatory response to CO_2 in man, **252,** 34*P*
Cardiac output, an evaluation of rebreathing techniques used in the measurement of –, **252,** 32*P*
Cardiac Purkinje fibre, a mounting device for short Purkinje fibres, **252,** 1*P*
Cardiac ventricular muscle, some electrical and mechanical effects of strontium on toad ventricular muscle: comparison to calcium, **252,** 547
Carotid sinus, simultaneous recording of the – dimensions and the baroreceptor nerve in the anaesthetized dog, **252,** 15*P*
Catechol convulsions, possible central cholinergic mechanism for the production of – (mouse), **252,** 19*P*
Catecholamine, calcium and stimulus-secretion coupling in the adrenal medulla: contrasting stimulating effects of the ionophores X-537A and A23187 on – ouput (cat), **252,** 363
Cerebellum, the effect of cooling Nucleus interpositus of the – in rhesus monkeys on the tracking of a visual target, **252,** 47*P*
Cochlear nerve, responses of units in the – and nucleus of the cat to signals in the presence of bandstop noise, **252,** 60*P*
Cold exposure, inhibition of thermal tachypnoea in rabbits following exposure to cold and water deprivation, **252,** 481
Cone, interactions of rod and – signals in the mudpuppy retina, **252,** 735
Contractile activity, apparatus for recording – in Purkinje fibres and other contractile preparations, **252,** 2*P*
Cortical neurones, the spontaneous activity of – in sleep and wakefulness, **252,** 18*P*
Cutaneous nerve, the sympathetic contribution to increase in heart rate evoked by – stimulation in the dog, **252,** 36*P*

Dehydration, inhibition of thermal tachypnoea in rabbits following exposure to cold and water deprivation, **252,** 481
Denervation, neurotrophic regulation of dynamic properties of skeletal muscle: effects of botulinum toxin and – (rat), **252,** 657
loss of α-bungarotoxin from junctional and extrajunctional acetylcholine receptors in rat diaphragm muscle *in vivo* and in organ culture, **252,** 771
Dentate gyrus, the actions of volatile anaesthetics on synaptic transmission in the – (guinea-pig), **252,** 241
2-Deoxy-D-glucose, neural systems responsible for the gastric secretion provoked by – cytoglucopoenia, (cat), **252,** 565
Development, the formation of synapses in amphibian striated muscle during –, **252,** 203
Diethyl ether, an alkyl etherase in rat liver, **252,** 537
Differentiation, – of motoneurones and skeletal muscles in kittens, **252,** 465
Dorsal horn neurones, micro-electrophoretic study of cat – activated by noxious stimuli, **252,** 23*P*

Episcope, the use of the – for projecting 'live' recordings, **252,** 14*P*
Erythrocyte, the stages of osmotic haemolysis, **252,** 817

Exercise, determination of the quantitative relationship between time varying work load and aortic blood flow and heart rate in the dog, **252,** 13*P*
changed vascular sensitivity to noradrenaline in rats trained by physical –, **252,** 38*P*
Exercise ventilation, comparison of effects of ammonia and CS aerosol upon – and cardiac frequency in healthy men, **252,** 28*P*
Exocytosis, sensitive osmometer function of juxtaglomerular cells *in vitro* (rat), **252,** 669

Fasting, effects of – and semi-starvation on the kinetics of active and passive sugar absorption across the small intestine *in vivo* (rat), **252,** 681
Free fatty acids, transfer of fatty acids across the rabbit placenta, **252,** 29
Frequency meter, an instantaneous – with numerical readout, **252,** 1*P*

Galactose transport, the compartmentalization of Na within rabbit ileum: the effects of D-galactose, **252,** 87*P*
Gastric secretion, neural systems responsible for the – provoked by 2-Deoxy-D-glucose cytoglucopoenia (cat), **252,** 565
Gastrin, mechanism of action of pentagastrin and acetylcholine in the longitudinal muscle of the canine antrum, **252,** 335
Glia, extracellular potassium activity, intracellular and extracellular potential response in the spinal cord (cat), **252,** 115
Glutamate, ionic mechanism of the excitatory synaptic membrane of the crayfish neuromuscular junction, **252,** 295
Goldfish, readjustment of retinotectal projection following reimplantation of a rotated or inverted tectal tissue in adult –, **252,** 137

Haemolysis, the stages of osmotic –, **252,** 817
Heart, resistive and capacitative loading of an isolated ejecting cat –, **252,** 12*P*
Heart rate, the sympathetic contribution to increase in – evoked by cutaneous nerve stimulation in the dog, **252,** 36*P*
entrainment of the human RR interval by thermal stimuli, **252,** 37*P*
Histamine, the *in vivo* metabolism of [^{14}C] – during pentagastrin-stimulated acid secretion in the cat, **252,** 75*P*

Hunger, visual and taste neurones in the lateral hypothalamus and substantia innominata: modulation of responsiveness by – (monkey), **252,** 50*P*

Infant vertex, the application of thermography to the detection of energy metabolism of the brain in the newborn infant, **252,** 44*P*
Insulin, effect of – upon membrane-bound ($Na^+ + K^+$)-ATPase extracted from frog skeletal muscle, **252,** 43
– and the control of plasma glucose concentration in chronically catheterized foetal lambs, **252,** 66*P*
Insulin secretion, the mechanisms of action of chloromercuribenzene-*p*-sulphonic acid as insulin secretagogue: fluxes of calcium, sodium and rubidium in islets exposed to mercurial and a membrane-active antagonist (mouse), **252,** 701
Intestinal absorption, the involvement of protein synthesis in the actions of angiotensin on fluid transport by rat jejunum *in vivo*, **252,** 78*P*
Intestinal sodium, the compartmentalization of Na within rabbit ileum: the effects of D-galactose, **252,** 87*P*
Intestinal transport, methods used to estimate the unidirectional fluxes of sodium simultaneously across the mucosal and serosal borders of rabbit ileum, **252,** 7*P*
Intestine, the effect of saline and hyperoncotic dextran infusion on canine ileal salt and water absorption and regional blood flow, **252,** 97
Intracellular pH, micro-electrode measurement of the internal pH of crab muscle fibres, **252,** 803
Intrafusal fibres, cinematographic analysis of contractile events produced in intrafusal muscle fibres by stimulation of static and dynamic fusimotor axons (cat), **252,** 397

Juxtaglomerular apparatus, sensitive osmometer function of juxtaglomerular cells *in vitro* (rat), **252,** 669

Lanthanum, the effect of – on miniature junction potentials at the goldfish neuromuscular junction after block by tetanus toxin, **252,** 81*P*
Lithium, – uptake into cerebral slices and the effect of K^+, Ca^{2+} and Mg^{2+} (rat), **252,** 82*P*

Lithium, – a K^+-like effect of – on sodium transport from blood into cerebrospinal fluid (rabbit), **252,** 83*P*
Liver, an alkyl etherase in rat –, **252,** 537
Locus coeruleus, the role of the – in the acquisition of a conditioned avoidance response (rat), **252,** 51*P*
Lung mechanics, influence of smooth muscle tone on intrapulmonary airway calibre (dog), **252,** 31*P*
Luteinizing hormone realising factor, dependence of the priming effect of – (LRF) on RNA and protein synthesis (rat), **252,** 73*P*

Magnesium fluxes, simultaneous measurements of magnesium, calcium and sodium influxes in perfused squid giant axons under membrane potential control, **252,** 1
Meperidine, two mechanisms for the – block of action potential production in frog's skeletal muscle; non-specific and opiate drug receptor mediated blockade, **252,** 585
Microtubules, synthesis of – protein in rat visual cortex during early post-natal life in relation to eye-opening, **252,** 27*P*
a correlation between the effects of antimitotic drugs on – assembly *in vitro* and the inhibition of axonal transport in noradrenergic neurones (cat), **252,** 283
Motoneurones, differentiation of – and skeletal muscles in kittens, **252,** 465
Motor cortex, hind limb vasodilatation evoked by stimulation of the – (cat), **252,** 22*P*
Motor unit, human motor unit contractions studied by controlled intramuscular microstimulation, **252,** 8*P*
Movement disorders, a visuomotor tracking task for investigating – in humans, **252,** 4*P*
Muscle, differentiation of motoneurones and skeletal muscles in kittens, **252,** 465
further studies on the control of ACh sensitivity by – activity in the rat, **252,** 603
micro-electrode measurement of the internal pH of crab muscle fibres, **252,** 803
Muscle spindles, correlation between ultrastructure and histochemistry of mammalian intrafusal muscle fibres, **252,** 16*P*
impulse activity and receptor potential of primary and secondary endings of isolated mammalian –, **252,** 259
cinematographic analysis of contractile events produced in intrafusal muscle fibres by stimulation of static and dynamic fusimotor axons (cat), **252,** 397
Myelinated nerve, the spatial distribution of action currents in rat myelinated fibres, **252,** 72*P*
the influence of pH on equilibrium effects of tetrodotoxin on – fibres of *Rana esculenta*, **252,** 159
the influence of pH on the rate of tetrodotoxin action on – fibres (*Rana esculenta*), **252,** 185

Nerve, a comparison of radioactive thallium and potassium fluxes in the giant axon of the squid, **252,** 79
Nerve regeneration, control of collateral sprouting in mechanosensory nerves of salamander skin, **252,** 20*P*
Neuromuscular junction, ionic mechanism of the excitatory synaptic membrane of the crayfish –, **252,** 295
discrete and discontinuous action of brown widow spider venom on the presynaptic nerve terminals of frog muscle, **252,** 491
Neurotrophic regulation, – of dynamic properties of skeletal muscle: effects of botulinum toxin and denervation (rat), **252,** 657

Olfactory bulb, mechanisms for processing of odour concentration in salamander – neurones, **252,** 49*P*
Opiate receptor, two mechanisms for the meperidine block of action potential production in frog's skeletal muscle; non-specific and opiate drug receptor mediated blockade, **252,** 585
Osmoreceptor, osmoreception and thirst in the dog, **252,** 55*P*
Osmoregulation, sensitive osmometer function of juxtaglomerular cells *in vitro* (rat), **252,** 669
Ouabain binding, the stimulation by phosphate of – to the sodium pump and its dependence on the method of preparing the membrane (rabbit, guinea-pig), **252,** 84*P*
Oxygen consumption, potassium-induced increase in – of brown adipose tissue from the rat, **252,** 523

Pancreas, secretion of electrolytes by the – of the anaesthetized rat, **252,** 379
Pancreatic secretion, hyperosmolarity, calcium movements and enzyme secretion in rat pancreas, **252,** 76*P*

Parturition, ACTH and the induction of – in sheep, **252,** 64*P*

Pepsin, the influence of secretin on the secretion of – in response to acid stimulants in the anaesthetized cat, **252,** 79

Permeability, the stages of osmotic haemolysis, **252,** 817

Placenta, transfer of fatty acids across the rabbit –, **252,** 29

Plasma glucose, insulin and the control of – concentration in chronically catheterized foetal lambs, **252,** 66*P*

Platelet aggregation, human blood – induced by dopamine, 5-hydroxytryptamine and analogues, **252,** 46*P*

pH, the influence of – on equilibrium effects of tetrodotoxin on myelinated nerve fibres of *Rana esculenta*, **252,** 159

the influence of – on the rate of tetrodotoxin action on myelinated nerve fibres (*Rana esculenta*), **252,** 185

micro-electrode measurement of the internal – of crab muscle fibres, **252,** 803

Potassium, – induced increase in oxygen consumption of brown adipose tissue from the rat, **252,** 523

Potassium current, the actions of 4-amino-pyridine on the delayed – in skeletal muscle fibres (frog), **252,** 70*P*

voltage-clamp analysis of transmembrane ionic currents in guinea-pig myometrium: evidence for an initial potassium activation triggered by calcium influx, **252,** 713

Potassium ions, extracellular potassium activity, intracellular and extracellular potential response in the spinal cord (cat), **252,** 115

Pressor response, enhanced – to noradrenaline in human subjects with chronic sympathetic decentralization, **252,** 39*P*

Prolactin, is – a fluid and electrolyte regulating hormone in man?, **252,** 54*P*

Prolactin secretion, the importance of intracerebral decarboxylation of L-DOPA in the suppression of –, **252,** 52*P*

Receptor, impulse activity and – potential of primary and secondary endings of isolated mammalian muscle spindles, **252,** 259

Renin, sensitive osmometer function of juxtaglomerular cells *in vitro* (rat), **252,** 669

Respiration, assessment of closure of lung units based on the pressure-volume curve, **252,** 30*P*

influence of smooth muscle tone on intrapulmonary airway calibre (dog), **252,** 31*P*

the separate effects of alternate-breath oscillations of P_{A,CO_2} during hypoxia on inspiration and expiration, **252,** 33*P*

effect of airway anaesthesia on the ventilatory response to CO_2 in man, **252,** 34*P*

Retina, effects of external ions on the synaptic transmission from photoreceptors to horizontal cells in the carp –, **252,** 509

Retinotectal projection, readjustment of – following reimplantation of a rotated or inverted tectal tissue in adult goldfish, **252,** 137

Rigor, mechanical properties of frog skeletal muscles in iodoacetic acid –, **252,** 319

Rod, interactions of – and cone signals in the mudpuppy retina, **252,** 735

Salivary gland, changes in submandibular striated ducts of cats after nerve stimulation or denervation, **252,** 56*P*

Salivary secretion, sympathetic and sympathomimetic stimulation of parotid – in sheep, **252,** 58*P*

Secretion, calcium and stimulus – coupling in the adrenal medulla: contrasting stimulating effects of the ionophores X-537A and A23187 on catecholamine output (cat), **252,** 363

– of electrolytes by the pancreas of the anaesthetized rat, **252,** 379

the influence of secretin on the – of pepsin in response to acid stimulants in the anaesthetized cat, **252,** 791

Skeletal muscle, effect of insulin upon membrane-bound $(Na^+ + K^+)$-ATPase extracted from frog –, **252,** 43

mechanical properties of frog – in iodoacetic acid rigor, **252,** 319

neurotrophic regulation of dynamic properties of –: effects of botulinum toxin and denervation (rat), **252,** 657

Small intestine, effects of fasting and semi-starvation on the kinetics of active and passive sugar absorption across the – *in vivo* (rat), **252,** 681

Smooth muscle, mechanism of action of pentagastrin and acetylcholine in the longitudinal muscle of the canine antrum, **252,** 335

voltage-clamp analysis of transmembrane ionic currents in guinea-pig myometrium: evidence for an initial potassium activation triggered by calcium influx, **252,** 713

Sodium currents, temperature-independence of total sodium flow: implications for theory of the active membrane, **252,** 69*P*

Sodium pump, effect of insulin upon membrane bound ($Na^+ + K^+$)-ATPase extracted from frog skeletal muscle, **252,** 43

the stimulation by phosphate of ouabain binding to the – and its dependence on the method of preparing the membrane (rabbit, guinea-pig), **252,** 84*P*

Sound localization, on the localization by humans of frequency-modulated tones, **252,** 59*P*

Spider venom, discrete and discontinuous action of brown widow – on the presynaptic nerve terminals of frog muscle, **252,** 491

Spinal cord, extracellular potassium activity, intracellular and extracellular potential responses in the – (cat), **252,** 115

Squid axon, simultaneous measurements of magnesium, calcium and sodium influxes in perfused squid giant axons under membrane potential control, **252,** 1

Starling forces, the effect of saline and hyperoncotic dextran infusion of canine ileal salt and water absorption and regional blood flow, **252,** 97

Stepping, backward placing in intact kittens and adult cats, **252,** 26*P*

Strontium, some electrical and mechanical effects of – on toad ventricular muscle: comparison to calcium, **252,** 547

Sugar transport, effects of fasting and semistarvation on the kinetics of active and passive sugar absorption across the small intestine *in vivo* (rat), **252,** 681

Sulphydyl reagents, the mechanisms of action of chloromercuribenzene-*p*-sulphonic acid as insulin secretagogue: fluxes of calcium, sodium and rubidium in islets exposed to mercurial and a membrane-active antagonist (mouse), **252,** 701

Sympathetic neurones, functional and structural changes in mammalian – following interruption of their axons (guinea pigs), **252,** 429

Sympatho inhibitory pathway, a role for a descending – in the ventral part of the spinal cord (cat), **252,** 21*P*

Synapse, functional and structural changes in mammalian sympathetic neurones following interruption of their axons (guinea pigs), **252,** 429

Synapse formation, the formation of synapses in amphibian striated muscle during development, **252,** 203

Synaptic transmission, the action of volatile anaesthetics on – in the dentate gyrus (guinea-pig), **252,** 241

effects of external ions on the – from photoreceptors to horizontal cells in the carp retina, **252,** 509

Teeth, functional coupling between nerve terminals in –, **252,** 25*P*

Tetanus toxin, the effect of lanthanum on miniature junction potentials at the goldfish neuromuscular junction after block by –, **252,** 81*P*

Tetrodotoxin, the influence of pH on equilibrium effects of – on myelinated nerve fibres of *Rana esculenta*, **252,** 159

the influence of pH on the rate of – action on myelinated nerve fibres (*Rana esculenta*), **252,** 185

Thallium fluxes, a comparison of radioactive thallium and potassium fluxes in the giant axon of the squid, **252,** 79

Thermal tachypnoea, inhibition of – in rabbits following exposure to cold and water deprivation, **252,** 481

Thermography, the application of – to the detection of energy metabolism of the brain in the new-born infant, **252,** 44*P*

Thirst, osmoreception and – in the dog, **252,** 55*P*

Transmitter release, discrete and discontinuous action of brown widow spider venom on the presynaptic nerve terminals of frog muscle, **252,** 491

Trophic influence, functional and structural changes in mammalian sympathetic neurones following interruption of their axons (guinea pigs), **252,** 429

Vascular infusion, a method for displaying the effect of altering the constants of a function and an application to the problem of maintaining steady blood concentrations, **252,** 5*P*

Vascular shunts, right to left – in the rat: a method, **252,** 4*P*

Vasodilatation, hind limb – evoked by stimulation of the motor cortex (cat), **252,** 22*P*

Vision, textured kinetic stimuli for use in visual neurophysiology: an inexpensive and versatile electronic display, **252,** 10*P*

Vision, contrast constancy: deblurring in human – by spatial frequency channels, **252,** 627
interactions of rod and cone signals in the mudpuppy retina, **252,** 735
Visual cortex, synthesis of microtubule protein in rat – during early post-natal life in relation to eye-opening, **252,** 27*P*
retinotopic organization in visual cortex and superior colliculus of the golden hamster, **252,** 41*P*
response of cat visual cortical cells to kinetic contours and static noise, **252,** 43*P*
Visual signals, – in the cat, **252,** 42*P*
Visual tracking, the effect of cooling Nucleus interpositus of the cerebellum in rhesus monkeys on the tracking of a visual target, **252,** 47*P*
Vole reproduction, aspects of reproductive physiology of the vole, **252,** 11*P*

CONTENTS OF VOLUME 253

No. 1 *November* 1975

PAGE

A study of hypothalamic neurosecretory cells of bullfrogs *in vitro*. By T. Ishikawa and Kiyomi Koizumi 1

Load compensation in human masseter muscles. By Y. Lamarre and J. P. Lund 21

Calcium content and exchange in frog skeletal muscle. By Albert C. Kirby, Barry D. Lindley and John R. Picken . 37

Dissociation between nerve–muscle transmission and nerve trophic effects on rat diaphragm using type D botulinum toxin. By J. J. Bray and A. J. Harris 53

Two phases of chorda-lingual induced vasodilatation in the cat's submandibular gland during prolonged perfusion with Locke solution. By J. Hedemark Poulsen 79

Post-natal developmental changes in the length–tension relationship of cat papillary muscles. By Patricia Davies, J. Dewar, Michael Tynan and R. Ward 95

Lipid A fever in cats. By P. K. Dey, W. Feldberg, K. P. Gupta and Sabine Wendlandt 103

Influence of the insulin sensitive central nervous system glucoregulator receptor on hepatic glucose metabolism. By Andrew J. Szabo and Olga Szabo 121

Cardiovascular and endocrine responses to feeding in the young calf. By S. R. Bloom, A. V. Edwards, R. N. Hardy, Krystyna Malinowska and Marion Silver 135

The release of pancreatic glucagon and inhibition of insulin in response to stimulation of the sympathetic innervation. By S. R. Bloom and A. V. Edwards 157

The effects of fusimotor stimulation during small amplitude stretching on the frequency–response of the primary ending of the mammalian muscle spindle. By G. M. Goodwin, M. Hullinger and P. B. C. Matthews 175

Effects of external potassium on potassium efflux and accumulation by rat adipocytes. By Lyle W. Horn and Kenneth Zierler 207

Avian febrile response. By Louis G. D'Alecy and Matthew J. Kluger 223

PAGE

Absorption of amino acids and peptides from a complex mixture in the isolated small intestine of the rat. By M. L. G. GARDNER . 233

Axoplasm architecture and physical properties as seen in the *Myxicola* giant axon. By DAVID S. GILBERT 257

Axoplasm chemical composition in *Myxicola* and solubility properties of its structural proteins. By DAVID S. GILBERT . . 303

No. 2 *November* 1975

Graded activation of myofibrils and the effect of diameter on tension development during contractures in isolated skeletal muscle fibres. By H. GONZALEZ-SERRATOS 321

The effects of muscle cooling and stretch on muscle spindle secondary endings in the cat. By W. J. MICHALSKI and J. J. SÉGUIN 341

Electromechanical studies on the inotropic effects of acetyl strophanthidin in ventricular muscle. By A. M. GREENSPAN and M. MORAD 357

Transmembrane exchange of chloride with bicarbonate ion in mammalian red blood cells: evidence for a sulphonamide-sensitive 'carrier'. By J. L. COUSIN, R. MOTAIS and F. SOLA 385

Effect of bradykinin on transepithelial transfer of sodium and water *in vitro*. By ANN D. CROCKER and STEPHEN P. WILLAVOYS . 401

Effects of angiotensin II on fluid transport, transmural potential difference and blood flow by rat jejunum *in vivo*. By JENNIFER E. BOLTON, K. A. MUNDAY, B. J. PARSONS and BARBARA G. YORK . 411

Vibration-induced discharge patterns of single motor units in the masseter muscle in man. By JOHN E. DESMEDT and EMILE GODAUX 429

Effects of divalent cations and of catecholamines on the late response of the superior cervical ganglion. By STEPHEN S. CHEN . 443

Retention and redistribution of proteins in mammalian nerve fibres by axoplasmic transport. By SIDNEY OCHS 459

Changes in statistical release parameters during prolonged stimulation of preganglionic nerve terminals. By ELSPETH M. MCLACHLAN 447

The effect of sympathetic nerve stimulation on serum gastrin, gastric acid secretion and mucosal blood flow responses to meat extract stimulation in anaesthetized cats. By E. L. BLAIR, E. R. GRUND, J. D. REED, D. J. SANDERS, G. SANGER and B. SHAW . 493

PAGE

The slow wave in the circular muscle of the guinea-pig stomach. By M. Ohba, Y. Sakamoto and T. Tomita 505

Some central mechanisms of thirst in the dog. By D. J. Ramsay and I. A. Reid 517

Milk secretion in the rabbit: changes during lactation and the mechanism of ion transport. By M. Peaker and Janet C. Taylor 527

The effects of prolactin and oxytocin on milk secretion and on the permeability of the mammary epithelium in the rabbit. By J. L. Linzell, M. Peaker and Janet C. Taylor 547

Analysis of activity of muscle spindles of the jaw-closing muscles during normal movements in the cat. By F. W. J. Cody, Linda M. Harrison and A. Taylor 565

A dissociation between fever and prostaglandin concentration in cerebrospinal fluid. By W. I. Cranston, R. F. Hellon and D. Mitchell 583

Catecholamine release from bovine adrenal medulla in response to maintained depolarization. By P. F. Baker and T. J. Rink . 593

SUBJECT INDEX

Absorption, – of amino acids and peptides from a complex mixture in the isolated small intestine of the rat, **253,** 233
Adipocytes, effects of external potassium on potassium efflux and accumulation by rat –, **253,** 207
Adrenal medulla, catecholamine release from bovine – in response to maintained depolarization, **253,** 593
Amino acids, absorption of – and peptides from a complex mixture in the isolated small intestine of the rat, **253,** 233
Angiotensin, effects of – II on fluid transport, transmural potential difference and blood flow by rat jejunum *in vivo*, **253,** 411
some central mechanisms of thirst in the dog, **253,** 517
Autonomic nervous system, cardiovascular and endocrine responses to feeding in the young calf, **253,** 135
Axon, axoplasm architecture and physical properties as seen in the *Myxicola* giant axon, **253,** 257
axoplasm chemical composition in *Myxicola* and solubility properties of its structural proteins, **253,** 303
Axon transport, dissociation between nerve–muscle transmission and nerve trophic effects on rat diaphragm using type D botulinum toxin, **253,** 53
Axoplasm, – architecture and physical properties as seen in the *Myxicola* giant axon, **253,** 257
– chemical composition in *Myxicola* and solubility properties of its structural proteins, **253,** 303
Axoplasmic transport, retention and redistribution of proteins in mammalian nerve fibres by –, **253,** 459

Bicarbonate exchange, transmembrane exchange of chloride with bicarbonate ion in mammalian red blood cells: evidence for a sulphonamide-sensitive 'carrier', **253,** 385
Birds, avian febrile response (pigeon), **253,** 223
Botulinum toxin, dissociation between nerve–muscle transmission and nerve trophic effects on rat diaphragm using type D –, **253,** 53
Bradykinin effect of – on transepithelial transfer of sodium and water *in vitro* (rat), **253,** 401

Calcium, – content and exchange in frog skeletal muscle, **253,** 37
catecholamine release from bovine adrenal medulla in response to maintained depolarization, **253,** 593
Cardiac glycosides, electromechanical studies on the inotropic effects of acetyl strophanthidin in ventricular muscle (frog), **253,** 357
Cardiac muscle, electromechanical studies on the inotropic effects of acetyl strophanthidin in ventricular muscle (frog), **253,** 357
Catecholamines, effects of divalent cations and of – on the late response of the superior cervical ganglion, **253,** 443
– release from bovine adrenal medulla in response to maintained depolarization, **253,** 593
Chloride exchange, transmembrane exchange of chloride with bicarbonate ion in mammalian red blood cells: evidence for a sulphonamide-sensitive 'carrier', **253,** 385
Contractures, graded activation of myofibrils and the effect of diameter on tension development during – in isolated skeletal muscle fibres (frog), **253,** 321

Endocrine response, cardiovascular and – to feeding in the young calf, **253,** 135
Endotoxin, avian febrile response (pigeon), **253,** 223
Epithelial transport, effect of bradykinin on transepithelial transfer of sodium and water *in vitro* (rat), **253,** 401
Excitation–contraction coupling, calcium content and exchange in frog skeletal muscle, **253,** 37
electro-mechanical studies on the inotropic effects of acetyl strophanthidin in ventricular muscle (frog), **253,** 357

Feeding, cardiovascular and endocrine responses to – in the young calf, **253,** 135
Fever, Lipid A – in cats, **253,** 103
avian febrile response (pigeon), **253,** 223

Fever, a dissociation between – and prostaglandin concentration in cerebrospinal fluid (rabbit), **253,** 583
Fusimotor stimulation, the effects of – during small amplitude stretching on the frequency–response of the primary ending of the mammalian muscle spindle (cat), **253,** 175

Gastric acid secretion, the effect of sympathetic nerve stimulation on serum gastrin, gastric acid secretion and mucosal blood flow responses to meat extract stimulation in anaesthetized cats, **253,** 493
Gastrin, the effect of sympathetic nerve stimulation on serum –, gastric acid secretion and mucosal blood flow responses to meat extract stimulation in anaesthetized cats, **253,** 493
Glucagon, the release of pancreatic – and inhibition of insulin in response to stimulation of the sympathetic innervation (dog, cat, sheep), **253,** 157
Glucose metabolism, influence of the insulin sensitive central nervous system glucoregulator receptor on hepatic – (rat), **253,** 121

Hypothalamus, a study of hypothalamic neurosecretory cells of bullfrogs *in vitro*, **253,** 1

Insulin, the release of pancreatic glucagon and inhibition of – in response to stimulation of the sympathetic innervation (dog, cat, sheep), **253,** 157
Insulin receptor, influence of the insulin sensitive central nervous system glucoregulator receptor on hepatic glucose metabolism (rat), **253,** 121
Intestine, absorption of amino acids and peptides from a complex mixture in the isolated small – of the rat, **253,** 233
effects of angiotensin II on fluid transport, transmural potential difference and blood flow by rat jejunum *in vivo*, **253,** 411

Jaw muscles, analysis of activity of muscle spindles of the jaw-closing muscles during normal movements in the cat, **253,** 565

Lactation, milk secretion in the rabbit: changes during – and the mechanism of ion transport, **253,** 527
the effects of prolactin and oxytocin on milk secretion and on the permeability of the mammary epithelium in the rabbit, **253,** 547
Lipid A, – fever in cats, **253,** 103
Liver, influence of the insulin sensitive central nervous system glucoregulator receptor on hepatic glucose metabolism (rat), **253,** 121
Load compensation, – in human masseter muscles, **253,** 21

Mammary gland, milk secretion in the rabbit: changes during lactation and the mechanism of ion transport, **253,** 527
the effects of prolactin and oxytocin on milk secretion and on the permeability of the mammary epithelium in the rabbit, **253,** 547
Mastication, load compensation in human masseter muscles, **253,** 21
analysis of activity of muscle spindles of the jaw-closing muscles during normal movements in the cat, **253,** 565
Milk, – secretion in the rabbit: changes during lactation and the mechanism of ion transport, **253,** 527
the effects of prolactin and oxytocin on – secretion and on the permeability of the mammary epithelium in the rabbit, **253,** 547
Motor units, vibration-induced discharge patterns of single, – in thema sseter muscle in man, **253** 429
Muscle, graded activation of myofibrils and the effect of diameter on tension development during contractures in isolated skeletal – fibres (frog), **253,** 321
Muscle spindle, the effects of fusimotor stimulation during small amplitude stretching on the frequency–response of the primary ending of the mammalian – (cat), **253,** 175
the effects of muscle cooling and stretch on the muscle spindle secondary endings in the cat, **253,** 341
analysis of activity of – of the jaw-closing muscles during normal movements of the cat, **253,** 565
Myocardial development, post-natal developmental changes in the length–tension relationship of cat papillary muscles, **253,** 95
Myxicola, axoplasm architecture and physical properties as seen in the – giant axon, **253,** 257
axoplasm chemical composition in – and solubility properties of its structural proteins, **253,** 303

Neonatal heart, post-natal developmental changes in the length–tension relationship of cat papillary muscles, **253,** 95
Nerve fibres, retention and redistribution of proteins in mammalian – by axoplasmic transport, **253,** 459
Nerve terminals, changes in statistical release parameters during prolonged stimulation of preganglionic – (guinea-pig), **253,** 477
Neurofilaments, axoplasm architecture and physical properties as seen in the *Myxicola* giant axon, **253,** 257
axoplasm chemical composition in *Myxicola* and solubility properties of its structural proteins, **253,** 303
Neuromuscular transmission, dissociation between nerve–muscle transmission and nerve trophic effects on rat diaphragm using type D botulinum toxin, **253,** 53
Neurosecretory cells, a study of hypothalamic – of bullfrogs *in vitro*, **253,** 1

Oxytocin, the effects of prolactin and – on milk secretion and on the permeability of the mammary epithelium in the rabbit, **253,** 547

Papillary muscle, post-natal developmental changes in the length–tension relationship of cat –, **253,** 95
Peptides, absorption of amino acids and – from a complex mixture in the isolated small intestine of the rat, **253,** 233
Potassium efflux, effects of external potassium on – and accumulation by rat adipocytes, **253,** 207
Preoptic nuclei, a study of hypothalamic neurosecretory cells of bullfrogs *in vitro*, **253,** 1
Prolactin, the effects of – and oxytocin on milk secretion and on the permeability of the mammary epithelium in the rabbit **253,** 547
Prostaglandin, lipid A fever in cats, **253,** 103
a dissociation between fever and – concentration in cerebrospinal fluid (rabbit), **253,** 583

Red blood cells, transmembrane exchange of chloride with bicarbonate ion in mammalian –: evidence for a sulphonamide-sensitive 'carrier', **253,** 385

Salicylate, a dissociation between fever and prostaglandin concentration in cerebrospinal fluid (rabbit), **253,** 583
Secretion, catecholamine release from bovine adrenal medulla in response to maintained depolarization, **253,** 593
Skeletal muscle, calcium content and exchange in frog –, **253,** 37
Smooth muscle, the slow wave in the circular muscle of the guinea-pig stomach, **253,** 505
Sodium, effect of bradykinin on transepithelial transfer of – and water *in vitro* (rat), **253,** 401
Stomach, the slow wave in the circular muscle of the guinea-pig stomach, **253,** 505
Submandibular gland, two phases of chorda-lingual induced vasodilatation in the cat's – during prolonged perfusion with Locke solution, **253,** 79
Sulphonamide, transmembrane exchange of chloride with bicarbonate ion in mammalian red blood cells: evidence for a – sensitive 'carrier', **253,** 385
Superior cervical ganglion, changes in statistical release parameters during prolonged stimulation of preganglionic nerve terminals (guinea-pig), **253,** 477
Sympathetic ganglion, effects of divalent cations and of catecholamines on the late response of the superior cervical ganglion, **253,** 443
Sympathetic system, the release of pancreatic glucagon and inhibition of the insulin in response to stimulation of the sympathetic innervation (dog, cat, sheep), **253,** 157

Temperature regulation, avian febrile response (pigeon), **253,** 223
Thirst, some central mechanisms of – in the dog, **253,** 517
Transmitter release, changes in statistical release parameters during prolonged stimulation of preganglionic nerve terminals (guinea-pig), **253,** 477
Trophic effects, dissociation between nerve–muscle transmission and nerve – or rat diaphragm using type D botulinum toxin, **253,** 53

Vasodilatation, two phases of chorda-lingual induced – in the cat's submandibular gland during prolonged perfusion with Locke solution, **253,** 79
Vibration, – induced discharge patterns of single motor units in the masseter muscle in man, **253,** 429

Water deprivation, some central mechaisms of thirst in the dog, **253,** 517
